HIV Confronted and Cured

“I learned that courage was not the absence of fear, but the triumph over it.” - Nelson Mandela

Join us as we seek to End the HIV Epidemic in Marion County, and accelerate the fight for a cure available for all.

The Red Ribbon Jubilee Campaign recognizes the increasing incidence of HIV among youth and adults in the Black community (54% of new HIV infections :) and the critical need to connect them to HIV information, health education, resources, and services which diminishes the risk of transmission and improves efforts to confront stigma which often inhibits persons from coming forward to know their HIV status. We need your help.
